Subject: Downers Grove Groundwater

Steve,

The owner of the site that once housed Principal Manufacturing Company is Mr. William Helwig, 9 S 456 Millbrook Drive, Downers Grove, IL 60516.

In response to a message from T. Krueger who asked for comments about the invitation letter, I suggested and he concurred with sending Principal and Helwig an invitation. In order to confirm if they were added to the mailing that Carl Cuffman sent out, I inquired of Carl who told me that he does not have a complete list of the invitees. Because Tom Krueger and Carol are both vacationing and won't return until next week, I'm taking the liberty of inviting both Principal and Mr. Helwig to the meeting. If when Tom and Carol return they express reservations about them being invited, I'll call each and suggest that they have no need to appear.

I promised Helwig a copy of the analytical and anticipated that my visit with him would give me an opportunity of ascertaining other facilities that occupied his building or some information about his knowledge of contamination when he bought the place. When can I get the report, even if in draft form?
